reclaimbox

reclaimbox

RECLAIM-in-a-box

Decentralised processing of waste for small, less accessible regions.

Easy Setup: Single day deployment, operates 8 hours nonstop.

High-Efficiency Sorting: Industrial-grade separation of recyclables.

Advanced Separation: Handles up to 7 material types, with magnetic recovery for metals.

Cost-Effective: No transport needed to central MRFs.

Quick Reconfiguration: On-site adjustments in under 30 minutes.

Enhanced Recovery: Processes fresh, non-compacted waste.

Distributed Recovery: Fleet of prMRFs ensures local, efficient material recovery.

Consortium:

The RECLAIM project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement no. 101070524.
